Oneonta, New York 13820

Phone: 607.433.3470  
Fax: 607.433.3489

**MEDIA NOTIFICATION FORM**

The City of Oneonta is experiencing a raw water supply shortage as a result of a break in the 10" raw water supply line from the Lower Reservoir to the Water Treatment Plant. All municipal water customers in the City and Town of Oneonta are hereby asked to immediately comply with water conservation measures, as outlined below, until further notice. The Water Department will issue an update when more information becomes available. The contact person is Water Treatment Plant Chief Operator Stan Shaffer, who can be reached at (607) 433-3470.

Please take the following steps to conserve water:

- Conduct regular and thorough surveys of your sink and toilet facilities to correct any leaks and reduce toilet tank volumes.
- Inspect your showers to see that water flow restrictions are in place.
- Do not water lawns until the water emergency is lifted.
- If possible, delay special projects requiring water use and routine flushing of your service lines until the water emergency is lifted.
